

Hennepin County Hiawatha Ave Bridge project

Standard contract language for bid that went to the lowest

"The contractor is hereby notified that Hennepin County is a participant in a Vehicle Emission Controls Clean Air Program. The program involves retrofitting construction equipment with Emission Control and/or Emission Monitoring Devices. The Contractor is encouraged to make a good faith effort to explore and evaluate the retrofitting of one or more pieces of construction equipment on this project, however, participation in this program is not mandatory. Selection of construction equipment on which to place the Control or Monitoring Devices will be based on the County's and Contractor's evaluation. Hennepin County will be responsible for all capital and maintenance costs associated with the program, including equipment purchase, installation, monitoring, repair, replacement, etc. Should the Contractor choose to participate in the program, the Contractor shall make their equipment available and cooperate with Hennepin County during installation, maintenance, repair, monitoring and analysis of Emission Control and/or Emission Monitoring Devices. At their discretion, the County may remove the Devices at the end of the project or may allow the Contractor to keep them installed on the construction equipment. All associated Contractor costs with this program shall be incidental and no addition payment shall be made to the Contractor."
